

Kasireddy Rajesh Kumar Reddy

B.Tech - (2024-28)| Artificial Intelligence and Data Science

+91-9121741165| rajeshkumarreddykasireddy5@gmail.com | <https://github.com/rajeshreddy021> | www.linkedin.com/in/rajesh-kumar-reddy-kasireddy-483812401

CAREER OBJECTIVE

Motivated Artificial Intelligence and Data Science undergraduate with strong foundations in machine learning, NLP, and problem solving. Experienced in building data-driven systems using TF-IDF, Random Forest, and Graph Neural Networks. Seeking an entry-level role to apply technical skills and develop scalable AI solutions.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Amrita Vishwa Vidyapeetham, Coimbatore

2024 – 2028, CGPA: 8.25

Senior Secondary

TSBIE Board

2022 – 2024, 91.5%

Secondary

CBSE Board

2022, 79.3%

TECHNICAL SKILLS

- **Programming:** C, Python, Java
- **Machine Learning:** Data Preprocessing, Feature Engineering, Model Evaluation, Supervised Learning
- **NLP:** Text Processing, TF-IDF, Tokenization
- **Graph ML:** Graph Neural Networks (GNN), GraphSAGE
- **Web Development:** HTML, CSS, JavaScript
- **Tools:** Git, GitHub
- **Libraries:** Scikit-learn, NumPy, Pandas
- **Core Concepts:** Data Structures, OOPs, Operating Systems, Computer Networks, MySQL

PROJECTS

AI Judge: Judicial Outcome Prediction Framework

Aug 2025 – Dec 2025

Machine Learning Project

- Built an AI-based system to predict judicial outcomes such as bail decisions and case judgments using Natural Language Processing on legal case reports.
- Designed an end-to-end ML pipeline including data preprocessing, text vectorization using TF-IDF, and classification using Random Forest.
- Achieved ~82% accuracy with zero false positives through effective feature engineering and model tuning.
- Improved decision reliability by optimizing model evaluation and validation techniques.
- **Tech Stack:** Python, Scikit-learn, NLP, Random Forest, TF-IDF

GNN-Based BLE Communication for BTS-Free Networks

Jan 2025 – Apr 2025

ML / Networking Research Project

- Developed a Graph Neural Network-based framework to enable Bluetooth Low Energy communication without base station infrastructure.
- Modeled devices as graph nodes using features like RSSI, battery level, and network congestion for efficient communication.
- Implemented GraphSAGE for node prediction achieving ~98% accuracy in network optimization.
- Enhanced scalability and reliability of decentralized communication systems.
- **Tech Stack:** Python, GNN, GraphSAGE, BLE, Machine Learning

Arduino-Powered Dust Collection Truck

Aug 2024 – Oct 2024

Embedded Systems Project

- Developed an autonomous dust collection vehicle using Arduino and ultrasonic sensors for obstacle detection and navigation.
- Implemented real-time motor control using Embedded C for efficient movement and automation.
- Designed a suction-based dust collection mechanism for automated cleaning.
- **Tech Stack:** Arduino, Ultrasonic Sensors, DC Motors, Embedded C
